Love the track, though I'm hesitant to use CC-BY-SA for some of my later works. Granted, for my later works I'd rather have original soundtracks anyway. Might be interested in using some of this for my early free games I'm planning (eventually I want to start doing bigger, commercial RPG games, but I've realized I can't start off doing this and its too much work for a first project).

This is amazing. End of story.

Anyhow, I would use this if I could use it commercially, the CC-BY-SA 3.0 license is a little too restricting for me at the moment. If you could remove that one, keeping the CC-BY 3.0 license, I would use it in my game, with credit. Right now my game is in development, and it may not come into anything, but I would like to keep my options open.

Thank you for considering, but it's your choice in the end.

Easily the best RPG battle theme on OGA right now. Although it is not exactly the style I am looking for in my current production, I think it would work well for a future production I am planning.

I've included this asset in the AnyRPG Engine. Its been featured in a YouTube livestream at <https://youtu.be/t4xqkYE9YrU> and you've been added to both the in-engine credits, and the credits at anyrpg.org.
